

PRESS RELEASE

ZITRÓN wins a contract to supply the tunnel ventilation equipment for Trafikverket's Stockholm bypass project

Gijón (Spain), October 2nd, 2020 –

ASSEMBLIN, under its contract FSE 903 with [TRAFIKVERKET](#), the Developer of Stockholm bypass, has awarded ZITRÓN with the supply of the tunnel ventilation equipment for Stockholm bypass project. This project will transform the city of Stockholm, connecting the southern and northern parts of the Stockholm county and relieving the arterial roads and the inner city of traffic.

ZITRÓN's contract, worth just over 155 million SEK (Swedish krona) and includes the design, manufacture and supply of 48 axial fans and 241 jet fans with their accessories.

ZITRÓN has extensive experience in the design, manufacturing and supply of underground ventilation systems and highly qualified experts to guarantee excellence in every project.

About ZITRÓN

Over the past 50 years, Zitrón has expanded to become one of the largest and most technologically driven and innovative ventilation companies in the world, spending much of its revenue on R&D, new equipment, personnel development and new manufacturing techniques.

The company was established in 1963 to service the Spanish underground coal mining industry and has its Global Head Office and main factory located in Asturias, in the north of Spain. Currently, ZITRÓN global reach spans over 80 countries on 5 continents.
